EDUCATION

B.Tech in Computer Science | GLA University

Expected Graduation: 2026 | CGPA: 8.3 (Up to 6th Semester)

Objective

Aspiring Full Stack Developer with a solid foundation in functional programming, system design, and problem-solving. I am eager to contribute to in mission of building high-performance, scalable systems by working on core frontend or backend components. I seek to apply my skills in real-world projects, develop efficient and reliable software solutions, and grow within a collaborative, technically rigorous environment that values innovation and clean code."

Technical Skills

Programming Languages: Java, JavaScript

Web Development: MERN Stack (MongoDB, Express.js, React, Node.js)

Version Control: Git, GitHub

Development Tools: Docker, Postman, Visual Studio Code

Soft Skills

- Strong problem-solving and analytical skills
- Effective communication and teamwork
- Adaptability and quick learning
- Time management and organizational skills
- Critical thinking and attention to detail

Project

Ride-Hailing Web Application (MERN Stack)

- Built a full-stack **ride-booking** platform enabling seamless **real-time ride requests**.
- Integrated **Google Maps API** for route tracking and **MongoDB** for user and ride management.

Taxi-Sharing Mobile Application (React Native expo, Node.js, Express, Mongoose)

- Developed a **cross-platform mobile app** **Rydelynk** for **taxi pooling**, optimizing ride costs.
- Implemented **user authentication**, **geospatial api**.

Certifications & Achievements

- Successfully completed a hands-on, job-oriented course to deepen proficiency in **MERN Stack development**
- Active contributor on Github

Excited to bring my full stack expertise to your organization and make a valuable impact within your team.
